

LBC*Clarity* Activity Analysis

Are our resources aligned to those activities that add most value to the business?

What proportion of the legal resource is being consumed by each business area?

What is the risk profile of the work we undertake?

Which are the areas of legal activity which we should prioritise for process improvement?

For legal teams looking for the answers and in need of a “snapshot” of how their resources are aligned and absorbed across their organisation, together with information on risk profiling, LBC Wise Counsel have developed an innovative technology based data collection and reporting solution. The system has been used by legal teams of varying size in both the private and public sectors and in locations throughout the world.

The system is hosted by LBC Wise Counsel and can be implemented in a very short time frame on a maximum weekly rental cost basis of £95 per user.

To learn more about the system or to request a demonstration, please contact:
